■ Stabilize your baby's bowl or plate

■ Keep houseplants from being knocked over by your pet

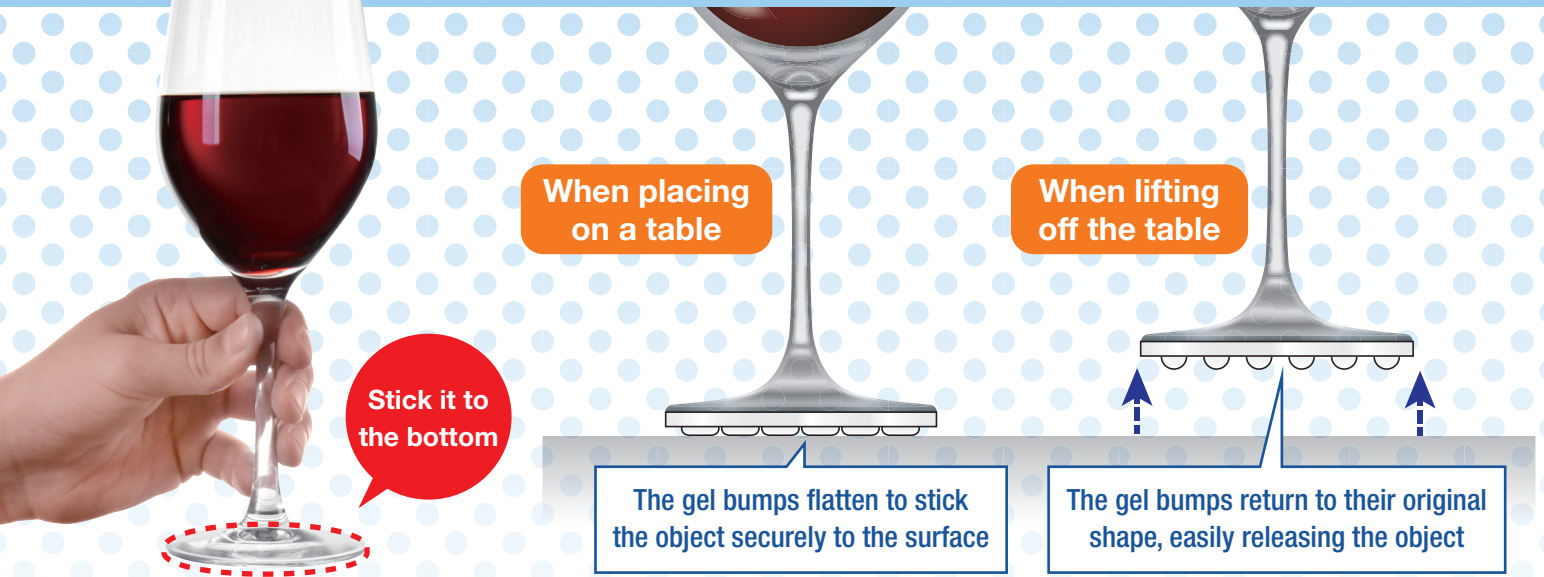

■ Avoid spilling coffee on your PC

Pro7 is a registered trademark of Proseven Co., Ltd. in Japan.

Safety & Security

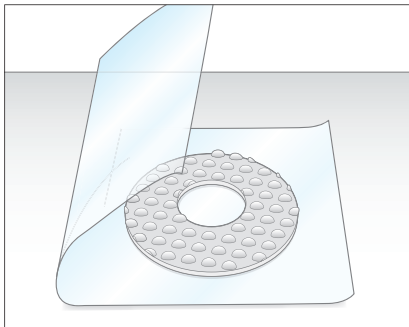

Proseven Co., Ltd.

Specially shaped gel bumps keep things in place

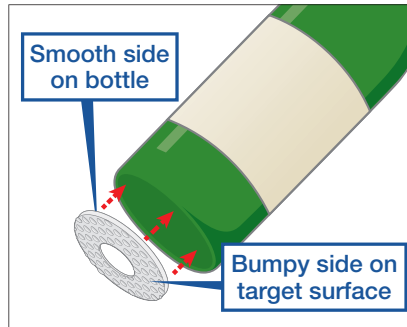

Example (bottle)

● Installation

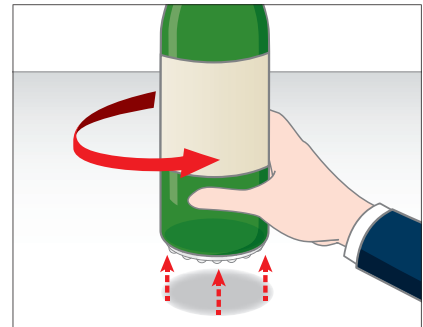

1. Thoroughly wipe off any dust or oil on the bottom of the bottle.
2. Peel off the plastic film on both sides of the gel pad.

3. Stick the smooth side of the gel pad onto the bottom of the bottle.
4. Thoroughly wipe off any dust or oil on the target surface (such as a table), and place the object on it.

● Removal

1. Make sure the contents of the bottle will not spill.
2. Remove the gel pad by slowly peeling it off from the edge.

Specifications

Size	L: 76 (dia.) × 3.5 mm
	M: 56 (dia.) × 3.5 mm
	S: 20 (dia.) × 3.5 mm*
Material	Polyurethane gel
Color	Transparent
Temperature range	-20°C to 75°C (-4°F to 167°F)

*S size has no hole in the center.

Note: As we constantly improve our products, specifications and appearance may change.

Features

- The gel pad's smooth side is stickier than the bumpy side, so it holds firmly to the object while allowing the object to be easily stuck to a surface and easily lifted off a surface with a twist.
- Antibacterial, mold-resistant. Washing with water brings back the gel pad's stickiness, allowing repeated use. Can be used under a wide temperature range.
- Pad shape, size, color, and stickiness can be changed to order. Contact us for details.
- Conforms to the RoHS 2 directive.

Precautions

- PRO7 Pads may be less effective depending on the object, surface, or usage environment.
- Proseven is not responsible for any problems—direct or indirect—arising from the use of PRO7 Pads.
- Do not eat PRO7 Pads. Keep them away from young children.
